

OUR STORY

and the

HISTORY of PAWPAP

Our story started in the 1960's in the rainforests of Borneo. One of our co-founders observed local villagers using pawpaw (Carica Papaya) on their skin.

We learnt that cultures around the world had known about the special properties of pawpaw for centuries. The ancient Mayans called pawpaw the "Tree of Life".

At M^cArthur Skincare we were determined to harness pawpaw's natural properties for wider application. We proudly created our unique M^cArthur Pawpaw Extract™ to enable us to incorporate very high percentages of this extract into all of our skin, hair and body care products. Our creams contain the highest percentage of a pawpaw extract on the market.

As an Australian operated company we use Australian grown pawpaws - after all we are privileged to have one of the most pristine growing environments in the world. Our products are not tested on animals and we refuse to use petrochemicals, parabens or added sulphates.

Dedicated to helping you feel and look your best.
